MRS. W. M. SADDLER.

EAST MILWAUKEE ST., JANESVILLE.

(Opera House Block.)

Mam facials and Dealer in Ladies' Hair Nets and all kinds of Human Hair Goods.

## MISCELLANEOUS.

For You, Madam,

Whose complexion betrays some humiliating imperfection, whose mirror tells you that you are Tanned, Sallow and disfigured in countenance, or have Eruptions, Redness, Roughness or unwholesome tints of complexion, we say use Hagen's Magnolia Balm.

It is delicate, harmless and a delightful article, producing the most natural and entrancing tints, the artificiality of which no observer can detect, and which soon becomes permanent if the Magnolia Balm is judiciously used.

## HAGEN'S MAGNOLIA BALM.

It is delicate, harmless and a delightful article, producing the most natural and entrancing tints, the artificiality of which no observer can detect, and which soon becomes permanent if the Magnolia Balm is judiciously used.

It is delicate, harmless and a delightful article, producing the most natural and entrancing tints, the artificiality of which no observer can detect, and which soon becomes permanent if the Magnolia Balm is judiciously used.

# HOME, FARM AND GARDEN.

There is no forage crop equal to corn.

Corn-worms are very poor climbers, and much of the damage they do to tomato plants may be avoided by making a compact mound about the plants as large as an inverted tea cup.

Dr. Harlan reports that some years ago he raised 500 bushels of potatoes to the acre by planting the sets on plowed and mellow ground, a foot apart, and covering them with straw from twelve to eighteen inches deep.

The great advantage of all the improved breeds of live stock over the common or "scrub" sorts is that they convert a larger proportion of the food they consume into animal products and these usually of a better quality.

Somebody may not know that if she makes more pie-crust than she cares to use it will keep for a day or two. Sprinkle a little flour over it and set it in a cool place; it will be flaky and crisp without being rich; or you may make tart of it, to be filled with jelly, jam or lemon custard.

It is a not uncommon error to imagine that animals that eat but little are the most profitable; so long as an animal is capable of digesting and assimilating it, the greater the amount of food it consumes the more profitable are the returns; for the proportion of the food that goes to supply the waste of tissue and run the animal machinery is less when a large than when a small amount is eaten.

Cream and Egg Toast.—Cheese crumbs; half pint of milk; two eggs; salt and pepper; butter; toasted bread. Put a cupful of cheese crumbs in the milk, and beat well. Add the eggs, salt, eggs, well-beaten, with butter and seasoning to taste; stir rapidly a few minutes, take from the fire—have ready the bread well toasted, and the slices cut in quarters; pour the cheese on, and serve at once very hot. This is a nice relish for tea or lunch.

To keep fresh eggs in good order through the summer, dip them in molten paraffine and place them in the small end in ordinary moist sand in a tight barrel. When the barrel is nearly full, fill up with sand and the sheet of packing-paper over the head of the barrel, and keep it in a cool place; or the eggs may be packed in a liquid lime-wash. The paraffine is odorless and tasteless, and can be removed by dipping the eggs in warm water, and is by far the neatest and cleanest method.

Cream sauce for puddings.—To make a bowlful of cream sauce take a piece of butter the size of a small egg and beat it up with powdered sugar until it is a light cream. Then set it aside. Then into a small tin saucepan put a coffee-cupful of water and add to it a teaspoonful of flour mixed in a little cold water. Cook this thoroughly until it is like thin starch. Then pour up the butter and sugar mixture, and while you are beating it energetically let some one pour into it slowly and gradually the hot flour sauce. If the beating is not stopped for a moment the whole sauce will rise and be as sea froth. Flavor with vanilla. This is the best sauce made. Potato flour is sometimes used instead of wheat flour.

Here is a recipe for coffee cake which is sure to please any one who is fond of coffee. Take one cup of molasses, one cup of butter, one cup of sugar, one cup of raisins, and one of currants, four cups of flour, one nutmeg grated, one teaspoonful of cinnamon, half a teaspoonful of soda or saleratus, mix the butter, molasses and sugar together, stir the spices into the flour, dissolve the soda, stir the currants and flour in by degrees, and lastly mix in the fruit. Bake in a greased butter tin well, and unless you are sure your oven will not bake too hard, you had better put a paper in the bottom of the tin. This cake keeps well. With more fruit it makes a good fruit cake. —Western Rural.

## Value of the Wren in Destroying Insects.

The observations I have been able to make during a residence of several years on a farm have convinced me that the common house wren is really one of our most valuable birds, not perhaps, from what they have done, but from the possibilities wrapped up in their diminutive bodies. They are quite as social as the purple martin or the bluebird, and greatly surpass either of these in the rapidity with which they increase. I began several years ago to provide them with nesting places in the vicinity of my buildings. Sometimes I fastened the shell of a horn on a pole, or a small box, in a tree top. But lately I have made a practice every spring to obtain thirty or forty cigar boxes for this purpose. If the box is long and large, I put a partition across the middle, and make a hole through into each apartment. It is very seldom that these boxes are not occupied by one of these little families. In most instances two broods are annually reared in each nesting place. One of my boxes last season turned out three broods of young wrens—six little hungry birds each time, or eighteen in all. I think a cigar box never before did better duty. The lamented Robert Kennicott stated that a single pair of wrens carried to their young about a thousand insects in a single day. Like all young, rapidly growing birds, they are known to be voracious, lively, living entirely upon insects. They point upon which most stress may be laid is this: That by providing them with nesting places in our gardens, orchards or grounds, and not allowing them to be caught by cats or scared away by mischievous boys, we may have saviors. If hundreds of them about us during most of the time in which insects are destructive. They undoubtedly return to the same localities year after year. Last season I had up about thirty of these nesting-boxes, and all but two or three, which were not favorably located, were occupied. My crop of wrens could scarcely have been less than one hundred and fifty, and the old birds filled the air with music when they were not on duty in building their nests or feeding their young. The coming spring I intend to put up at least a hundred of these nesting-boxes in my orchards and groves, and I have no doubt I shall be repaid a hundred thousand fold for the little labor it costs. As long as they come back so regularly every year and in constantly increasing numbers, and serve me so well, I shall do all in my power to protect and encourage them. And I am of the opinion that when one species of social, useful birds can be made to congregate in such unusual numbers, others will come also. But the hardships, sociability, and industry of these little wrens, and wonderful fecundity of the little house wren, render it in my judgment, one of the most valuable of our insectivorous birds. —Cor. American Naturalist.

## WIT AND WISDOM.

—One-half the world doesn't know how the other half lies about it. —Modern Argosy.

—Most inventors die poor. The proverb has truly said that invention is the mother of necessity. —Chico.

—A medical writer says children need more wraps than adults. They generally get more

For sale at Gazette Counting Room at a bargain, a 10 inch Philadelphia Lawn Mower.

All who are indebted to the late firm of Carpenter & Gowdey are requested to settle their accounts at once, as it is desired that the books be closed up as speedily as possible.

WANTED.—A house of nine or ten rooms. For particulars inquire at this office.

For Sale.—One of the celebrated Improved Howe sewing machines, new and in perfect running order, price low, at the GAZETTE counting room.

#### LOCAL MATTER.

Ladies' and Gents' Stationery. For a good article of Writing Paper, Envelopes, Pens, Ink, etc., at reasonable prices, call at Sutherland & Bookstore.

MANHOOD RESTORED. A victim of early imprudence, causing nervous debility, premature decay, etc., having tried in vain every known remedy, has discovered a simple means of self-cure, which he will sell free to his fellow sufferers. Address J. H. REEVES, 48 Chatham st., N.Y.

#### A Liberal Offer.

WAGNER & CO., Michigan Ave. & Jackson St., Chicago, offer to send Electric Belts, Bands, etc., for the cure of Nervous Debility and other diseases, free, for examination and trial before purchasing. These Electric Belts are the invention of Dr. D. A. JOY, of the University of Michigan, and are claimed to be the only Electric Belts or Appliances for the cure of diseases that have yet been constructed upon scientific principles. See their advertisement in this paper.

A Cough, Cold, or Sore Throat should be stopped. Neglect frequently results in an Incurable Lung Disease or Consumption. BROWN'S BRONCHIAL THROAT CURE does not disorder the stomach like cough syrups and balsams, but acts directly on the inflamed parts, allaying irritation, giving relief in Asthma, Bronchitis, Coughs, Croup, etc., and the Throat troubles which singers and public speakers are subject to. For thirty years Brown's Bronchial Cough Cure has been recommended by physicians, and always gives perfect satisfaction. Having been tested by wide and constant use for nearly an entire generation, they have attained well-merited rank among the few staple remedies of the age. Sold at 25c a box everywhere.

tricity and wires in some form are necessary to the prompt giving of alarms, and not a single alarm seems to have been given to the department except by electrical means.

#### Love Your Neighbor

When your friend or neighbor is laboring under bodily affliction, indigestion, biliousness, constipation, caused by impurity of blood, or disorders of the kidneys or liver, don't fail to recommend Burdock Blood Bitters, a sure and safe remedy. Price \$1.00 and trial size 10 cents.

For sale by A. J. Roberts and Sherer & Co.

#### A BIG SCARE.

About three o'clock this morning during the big thunder storm, the lightning took a freak to enter a window of the cotton factory. It was accompanied by a tremendous clap of thunder, and as it shot into the second story of the factory, and played among the looms, it naturally enough caused a sudden and wild panic among the operatives, who screamed and ran. Some of the waste cotton under the looms caught fire and for a few minutes there was the wildest sort of a scene. The incipient blaze was speedily snuffed by water, there being hose always ready for use in such emergencies. No damage was done, but the operators, mostly girls, had their nerves badly shaken up, and they scattered for their homes at once.

It appears that it was not a regular bolt of lightning which thus created the panic, for the machinery is not injured in the least, and there is not a mark or a scratch. The air was full of electricity and a number of telegraph wires run along near the window where the electric fluid entered, and it is thought that the lightning jumped from the wires into the machinery as the nearest and best conductor it could find. As a soother to those whose nerves were so shaken by the lightning, Mr. Bailey, as well as Mr. Ray, both of whom have been connected with cotton factories nearly all their lives, say they never heard of an operator being killed by lightning in a cotton factory, and though instances are known where the machinery has been badly injured by lightning yet those standing near escaped uninjured, the machinery proving a more tempting conductor for the lightning than the human body. All this is soothing and yet it isn't pleasant to have such things happen upon you so near, and if the lightning can find some other playground, it will suit the operators quite as well, for if just a spark, or a splinter off a regular bolt, could play such mischief among the looms, a full grown one wouldn't be at all agreeable.

#### PERSONAL.

—Mrs. S. S. Judd leaves for a few weeks visit among friends in La Crosse, and Lansing, Iowa.

—Mr. and Mrs. W. A. Hand are now making the Pember house their headquarters, expecting soon to go to house-keeping.

#### KILLED AT HIS POST.

Early this morning during the progress of the big thunderstorm, Samuel Heffler, the night operator at the Evansville railway station, was killed instantly by lightning. He was in the act of reaching for a book when the shock came over the wires, and he fell back dead. The only mark found upon him was on his right side where appeared a blue spot about two inches in diameter. A doctor arrived within ten minutes after he fell, but there was not the least sign of life. He was a young man, and had been employed in the office there but a short time.

Mr. J. Marsh, Bank of Toronto, Ont., writes: "Biliousness and dyspepsia seem to have gotten up with me, having been a sufferer for years. I have tried many remedies, but with no lasting result until I used your BURDOCK BLOOD BITTERS. They have been truly a blessing to me, and I cannot speak too highly of them. Price \$1.00; trial size 10 cents.

Sold by A. J. Roberts and Sherer & Co.

#### THE WEATHER.

REPORTED BY FRANKLIN & EVENSON, DRUGGISTS.

The thermometer at 6 o'clock last night stood at 80 degrees above; at 1 o'clock A. M. to-day at 72 degrees above; at 7 o'clock at 71 degrees above; and at 1 o'clock P. M. at 89 degrees above. Heavy rain with thunder and lightning last night. Showery to-day.

For killing flies and all kinds of insects there is nothing equal to the Genuine Insect Powder sold by Roberts and Sherer, the Druggists, at the Post office, Janesville, Wis.

#### AMONG THE MODOS.

Miss Frances E. Willard has many friends here, where she spent her girlhood, who will be interested in the following little incident related by herself, in a letter concerning her recent visit to the far West, and the meetings held by her among the Indians:

Then, to my entire surprise, four bright eyed Modoc girls came forward, and holding a pretty bead basket trimmed with ribbon, they made in perfect English and admirable concert, the following speech (written out for me by one of them): "Dear Miss Willard, we feel thankful to our Heavenly Father that we have been permitted to look into your face and to listen to the good words you have spoken, and hope that they will do us and our people good. We are poor little Indian children, and have nothing very nice that we can give you, but will you please accept this little basket as a token of our love, and when you look upon it remember the little Modoc girls. And now may the Lord bless thee and keep thee; the Lord make his face to shine upon thee and be gracious unto thee; the Lord lift up thy countenance upon thee and give thee peace."

Well, when those fresh young voices ceased it was very quiet in the little church, for I tried in vain to speak, and we all cried away. Somehow it was so blessed and so wonderful—the change in these "Modocs of the Lava Beds," and the dear gospel temperance cause which had brought us face to face, had renewed so many ruined lives of those who sat about me, that I wished in vain "that my tongue might utter the thoughts that arose in me."

FOR SALE.—At Gazette counting room a wire flower stand.

#### COMMERCIAL NEWS.

JANESVILLE MARKETS.
